## ANAP2MC - Introduction

## ANAP2MC - Admission

***For the specific conditions of this program : refer to the French version***

Decree of March 31st 2004 defining higher education, favoring its integration in the European framework of higher education and refinancing universities.

The admission requirements have to be met at the time of enrolment at the university.

All information can be obtained from the [University's Enrolment Office \(Service des inscriptions – SIC\)](#).

The following students, after meeting the conditions set by the academic authorities, have access to the complementary Master's degree with the aim of obtaining the grade that these studies sanction:

- An academic Master's degree within the same field allowing 2nd-cycle studies, including at least 120 credits
- An academic Master's degree, following a decision by the academic authorities, under the complementary conditions that they set and as a result of a motivated decision by the jury
- An academic grade which is similar to those mentioned above, issued by the Flemish Community, the German Community or the Royal Military Academy, under the same conditions
- A foreign academic grade that has been acknowledged as being equivalent to those mentioned above, in application of this decree, a European-level directive or an international convention, under the same conditions
- Under the same conditions, one or several titles or academic grade issued by the Flemish Community, the German Community or the Royal Military Academy, sanctioning 2nd-cycle studies and valued at least 300 credits by the jury, or sanctioning 2nd-cycle studies and valued at least 240 credits completed of 60 credits, the all that must be valued by the jury according to the decree of March 31st, 2004 (art 54, 5 °)

---

In the event of the divergence between the different linguistic versions of the present conditions, the French version shall prevail

## ANAP2MC - Information

### Learning outcomes

---

This complementary master's programme aims to prepare doctors to be recognised holders of the special professional title of Specialist Doctor in Pathological Anatomy. (Ministerial Decree of 26.04.198, published on the 01.07.1982).

### Evaluation

---

Exams at the end of the first and second parts of the programme, aimed at evaluating the candidate's abilities in the domains of morphological analysis and diagnostic conclusions.

Further to the application of the Royal Decree of 16th March, 1999, at the end of the first two years of training, the candidate will receive an attestation proving that he has successfully accomplished a specific university training programme. The exam focuses on autopsy pathologies and surgical pathology. The cases selected for the exam are presented by the candidate during one of the service seminars.

The exam for the 2nd part focuses on the analysis of pathological cases from various sectors, as well as the writing of a thesis on a subject linked to pathological anatomy. The evaluations are carried out by the ensemble of the pathologists from the sectors concerned who have participated in the training programme.

Upon successful fulfillment of all the above-described training requirements, the teaching committee will duly award the academic title in Pathological Anatomy.

This title does not replace official recognition by the ministerial validation committee. It attests the successful completion of an academic and scientific programme in the context of specialised training leading to validation.

## ANAP2MC - Detailed programme

### Programme structure

---

The training course includes full time apprenticeships in recognised services and teaching centres. It lasts for at least five years, full-time, and is divided up into two years of foundation studies including specific university courses, followed by three years of extended studies. The apprenticeship project established by the university promoter must be approved by the ministerial validation committee for the speciality. These apprenticeships include being on call.

### Programme by subject

---

Parallel to the practical training, the specialist candidate will follow a university programme organised as follows :

#### **First part - Foundation studies (FUS)**

These two first years of studies consist of :

- Theory : Complements of Pathological Anatomy, Clinical Cytology, Pathological Histochemistry and Cytochemistry
- Seminars
- Supervised hospital ward training : Demonstrations and protocols regarding pathological anatomy (autopsies and surgical specimens )
- Practical training periods in pathological anatomy in laboratories approved by the Ministry of Public Health, recognised by the Teaching Committee for Pathological Anatomy. This training includes practising and interpreting autopsies from a macro and microscopic point of view and examining surgical specimens as well as the anatomo-pathological bases of legal medicine.

#### **Second part - Further training**

Three years of studies, consisting of :

- Theory : questions on special pathological anatomy, special pathological anatomy of the nervous system and muscles
- Seminars : seminars on special pathological anatomy, seminar on dermatopathology and cutaneous immunopathology
- Supervised hospital ward training : Demonstrations and protocols regarding histodiagnosis in special pathological anatomy, including neuropathology
- Apprenticeships in approved laboratories concentrating on examining biopsies and cytological material within various sectors of pathology.
