MEFY2MC - Introduction

MEFY2MC - Admission

For the specific conditions of this program : refer to the French version

Decree of March 31st 2004 defining higher education, favoring its integration in the European framework of higher education and refinancing universities.

The admission requirements have to be met at the time of enrolment at the university.

All information can be obtained from the [University's Enrolment Office \(Service des inscriptions – SIC\)](#).

The following students, after meeting the conditions set by the academic authorities, have access to the complementary Master's degree with the aim of obtaining the grade that these studies sanction:

- An academic Master's degree within the same field allowing 2nd-cycle studies, including at least 120 credits
- An academic Master's degree, following a decision by the academic authorities, under the complementary conditions that they set and as a result of a motivated decision by the jury
- An academic grade which is similar to those mentioned above, issued by the Flemish Community, the German Community or the Royal Military Academy, under the same conditions
- A foreign academic grade that has been acknowledged as being equivalent to those mentioned above, in application of this decree, a European-level directive or an international convention, under the same conditions
- Under the same conditions, one or several titles or academic grade issued by the Flemish Community, the German Community or the Royal Military Academy, sanctioning 2nd-cycle studies and valued at least 300 credits by the jury, or sanctioning 2nd-cycle studies and valued at least 240 credits completed of 60 credits, the all that must be valued by the jury according to the decree of March 31st, 2004 (art 54, 5 °)

In the event of the divergence between the different linguistic versions of the present conditions, the French version shall prevail

MEFY2MC - Information

Learning outcomes

This complementary master's programme aims to prepare doctors to become officially recognised holders of the specific professional title of Specialist Doctor in Physical and Rehabilitation Medicine (Ministerial Decree of 20.10.2004, published on 22.11.2004).

Evaluation

Further to the application of the Royal Decree of 16 March, 1999, at the end of the first two years of training, the candidate will apply for an attestation proving that he has successfully accomplished a specific university training course.

The evaluation and final exam are based on :

- the presence and active participation in the lectures on the speciality (see work training notes),
- the presentation of a scientific piece of work before a national or international audience
- the publication of a piece of work with the candidate as the principal author.

In addition, the global evaluation will include the result of the European Board exam for Physical and Rehabilitation Medicine, as well as the evaluation conducted by the different training supervisors on the ability and clinical aptitudes of the candidate to practise Physical and Rehabilitation Medicine. Upon fulfilment of the above-described training requirements, the teaching committee will award the academic title in Physical and Rehabilitation Medicine.

This title does not replace official recognition by the ministerial validation committee. It attests to the successful completion of an academic and scientific study programme in the context of specialised training leading to this validation.

MEFY2MC - Detailed programme

Programme structure

The programme includes full-time apprenticeships in approved services and teaching centres. It lasts at least five years, full-time, and includes at least 4 years of studies dedicated to specific diagnostic techniques and treatment in the domain of Physical and Rehabilitation Medicine, including the socio-professional reintegration of handicapped persons. At least one year is dedicated to various techniques in preparation for the carrying out of neurophysiological examinations.

The practical training project, established by the university promoter, must be approved by the ministerial validation committee for the speciality. These apprenticeships include being on call.

N.B. the candidate will need to accomplish a one-year work experience period abroad, in a service approved by the Committee for Physical and Rehabilitation Medicine, or in a research laboratory, preferably in the third or the fourth year of studies.

Programme by subject

Parallel to the practical training, the candidate specialist will follow a university course organised as follows :

First part

An inter-university programme consisting of lectures on different subjects relating to Physical and Rehabilitation Medicine, covering the diagnoses and evaluation of injuries, disabilities and handicaps and physical and rehabilitation medical treatments for locomotor aid where the aetiology is traumatic, orthopedic, rheumatic, neurological, congenital or linked to internal pathology. These studies must prepare the "MACCS" for the knowledge of rehabilitation in children and adults as much on a functional as on a social and professional level (including pain treatment and rehabilitation). To this is added a complementary training session in the domain of pulmonary and/or cardiac rehabilitation. The inter-university sessions amount to 30 hours a year, 4 hours of which are on algology.

An intra-university course consisting of :

MEFY2120 Réhabilitation motrice et compléments de médecine physique[15h] (in French) Léon Plaghki

- Supervised practical exercises (30 hours per year).
- Attendance of the Physical and Rehabilitation Medicine lectures linked to the approved apprenticeship periods. (see subjects within the different domains of Physical and Rehabilitation Medicine linked to the above speciality), to be certified in the training report notes (30 hours per year).
- Attendance, each year, of lectures in other specialities (neuro-locomotor, radiology, cardiac rehabilitation, pulmonary rehabilitation and pediatric rehabilitation, also including 10 hours of algology (anaesthetics, psychiatry, etc..) to be certified in the training report notes (30 hours per year).

The theoretical sessions of the first two years form part of the specific university training programme (FUS, in French).

Second part

After the first 2 years, the " MACCS" will continue his studies including, among other activities :

- Attendance of further training seminars in Physical and Rehabilitation Medicine (to be certified in the course report notes).
- Attendance of national and international scientific meetings.
- Active annual participation in at least one intra-university seminar.
- The writing of a scientific article to be presented at the end of the 4th year and accepted for publication as the principal author in the 5th year, either for a journal with a peer review representative of the speciality or an annex speciality (orthopaedics, neurology, rheumatology...), or indexed in the Medline. In the case of a journal not indexed in the Medline, prior approval must be obtained from the academic supervisor of the master's programme.
- The teaching Committee recommends the taking of the European Board exam in the speciality.
