## **SPED2M - Introduction**

## SPED2M - Admission

***For the specific conditions of this program : refer to the French version***

*General and specific admission requirements for this program must be satisfied at the time of enrolling at the university..*

## SPED2M - Information

### Learning outcomes

The Master in Population Sciences and Development is an interdisciplinary program which studies the relationship between population and development. It includes related disciplines such as anthropology, demography, economics, political science, sociology and history. It prepares students for a professional career in the fields of demography and development and for research on both developed and developing countries.

Thanks to the wide range of focuses (two professional and one research) and options (seven in all), students can choose between different fields and gain specialization both in the subject (demography or development) or the geographical area (the main regions of the world) as well as in the methods (qualitative or quantitative) and professional objectives (action or research). Students will acquire strongly valued skills (for further details, please visit the Department website at <https://www.sped.ucl.ac.be> ).

### Teaching method

The Master in Population Sciences and Development is an interdisciplinary program in the true sense of the term, through its main objective (bringing together the two fields of demography and development), through the teaching staff and the teaching material (from different disciplines) and also through the students (the Master is open to any university bachelor). All of this makes the teaching methods open and dynamic. Students are encouraged to work both individually and in groups, using the most effective communication and information tools. They may also participate in an internship in an organization, and enterprise or in a research team.

### Evaluation

Methods of assessment vary according to the activity. For the foundation courses, it often takes the form of written examinations where reference to books is allowed, possibly as continuous assessment; seminars require written work or oral presentation, both individually and in groups. Other methods such as role play may also be included.

### Mobility and/or Internationalisation outlook

It is possible to participate in an internship programm abroad or to take a selection of subjects or a complete optional subject (maximum of 30 credits) in a foreign university which offers an equivalent Master, conditional on the agreement of the academic coordinator and a formal agreement with the relevant university. similarly, foreign students may join the Master's programme, particularly for the options. Exchange programmes such as Erasmus and Erasmus Mundus are available with other European universities such as the Universities of Paris 1 and Paris 10, the University of Geneva, the Graduate Institute of International and Development studies (IUED) in Geneva or the Institute of Socio-Economic Development Studies ( IEDES -Paris 1). They also involve Latin American universities (such as the Catholic University of Peru or University of Paraíba in Brazil), the University of Montreal and universities from the Arab world (such as Cairo University or Saint Joseph University in Beirut). Exchange programs overseas normally take place in the first or second semester of the second year.

Finally, the optional subject Gender is an part of the European Master in Gender and Development organized in partnership with the University of Geneva, the University of Paris 7, the Institute of Social Studies (ISS) at the Hague and the Royal Tropical Institute in Amsterdam.

Some courses may be given in English or in Spanish.

### Possible trainings at the end of the programme

Doctoral programmes:

With this Master, students can apply for a doctorate in Social Science (Demography or Development, Population, Environment). PhD students register in the Doctoral School in Development Studies (comprising 7 Francophone Belgian universities) and in the Doctoral School in Social Science (which includes demography among other subjects)

## Certificates

---

Students who attend all of the options in one of the groupings (30 CR) may be awarded a university certificate, in conjunction with the University Institute of Continuing Education (Institut universitaire de formation continue - IUFC).

## SPED2M - Detailed programme

### Programme structure

The Master in Population Sciences and Development comprises :

- core subjects (60 credits)
- three focuses (30 credits each)
- a research focus
- a professional focus in demography
- a professional focus in development
- seven options (30 credits each), five of which are related to professional focuses and two to research focuses.

In addition to the core subjects (60 credits), students must choose one of three focuses (30 credits) and one of the options relevant to their chosen focus (30 credits) to make up a course of 120 credits.

Regardless of the focuses and options that are chosen, the programme for this Master must total a minimum of 120 credits, spread over two years of study. This corresponds to 60 credits per year.

*Whatever the focus or the options chosen, the programme of this master shall totalize 120 credits, spread over two years of studies each of 60 credits.*

### Programme by subject

### Core courses [60.0]

Le tronc commun du master a pour objectif une bonne formation de base de l'ensemble des étudiants aux problèmes respectifs de population et de développement ainsi qu'à leurs interactions. Une attention particulière est apportée aux mutations spatiales et temporelles de la problématique population-développement.

- > Professional focus:Demography [en-prog-2013-sped2m-lsped201s]
- > Professional focus:Development [en-prog-2013-sped2m-lsped200s]

### ***PROFESSIONAL FOCUS:DEMOGRAPHY [30.0]***

Cette finalité axée sur la démographie a un objectif de professionnalisation répondant à une demande d'institutions diverses. Les outils théoriques et techniques de la démographie y sont approfondis et donnent aux étudiants un savoir-faire dans le domaine de la collecte, l'analyse et le traitement informatique et statistique de données socio-démographiques. Les séminaires consistent à mettre en pratique les connaissances pour répondre à des questions de recherche et des demandes d'acteurs dans le domaine de la démographie (administration, ONG,...).

La finalité comprend 6 cours et séminaires obligatoires (30 crédits). La formation se poursuit par un choix entre une des deux options : Populations et sociétés, et Méthode de collecte et d'analyse de données.

***PROFESSIONAL FOCUS: DEVELOPMENT [30.0]***

Cette finalité, axée sur les études du développement, a pour objectif d'offrir une formation spécialisée sur les problèmes de développement, en particulier ceux des sociétés non-occidentales. Elle ouvre, notamment, au travail dans la recherche ou dans des institutions diverses (ONG, institutions internationales,...). Elle vise la capacité à analyser une problématique de développement sur une base interdisciplinaire et comparative. Elle conjugue l'analyse des réalités locales et leurs interactions avec les dynamiques globales.

Le programme, qui aborde les différentes problématiques liées au développement (genre, migration, économie populaire, ressources naturelles, environnement,...), permet aux étudiants d'intégrer théorie, recherche et action. La formation se poursuit par un choix entre deux options : Analyse du développement par aires géographiques, et Projets et programmes.

- > [Projets et programmes](#) [en-prog-2013-sped2m-lsped2020]

### OPTIONS DE LA FINALITÉ SPÉCIALISÉE EN DÉMOGRAPHIE

#### POPULATIONS ET SOCIÉTÉS

Cette option met l'accent sur des problématiques liées à des enjeux essentiels du monde contemporain : urbanisation et migrations, santé, vieillissement, relations intergénérationnelles et politiques de population. Avec un choix possible de cours (10 crédits sur les 30), elle offre aussi à l'étudiant une possibilité de spécialisation thématique.

***PROJETS ET PROGRAMMES [30.0]***

Cette option combine une formation technique et une formation aux approches pluridimensionnelles. Elle permet d'entrer dans la démarche gestionnaire des organismes (publics ou privés, internationaux ou locaux) à la base des projets et de faire preuve de maîtrise professionnelle dans un domaine (santé, infrastructure, production agricole...). Elle situe également les différents acteurs impliqués dans ces projets et programmes dans leurs trajectoires historiques et dans leurs capacités d'innovation.
