## ANAP2MC - Introduction

### Introduction

---

## ANAP2MC - Teaching profile

### Learning outcomes

---

This complementary master's programme aims to prepare doctors to be recognised holders of the special professional title of Specialist Doctor in Pathological Anatomy. (Ministerial Decree of 26.04.198, published on the 01.07.1982).

### Programme structure

---

The training course includes full time apprenticeships in recognised services and teaching centres. It lasts for at least five years, full-time, and is divided up into two years of foundation studies including specific university courses, followed by three years of extended studies. The apprenticeship project established by the university promoter must be approved by the ministerial validation committee for the speciality. These apprenticeships include being on call.

## ANAP2MC Detailed programme

### Programme by subject

---

Parallel to the practical training, the specialist candidate will follow a university programme organised as follows :

#### First part - Foundation studies (FUS)

These two first years of studies consist of :

- Theory : Complements of Pathological Anatomy, Clinical Cytology, Pathological Histochemistry and Cytochemistry
- Seminars
- Supervised hospital ward training : Demonstrations and protocols regarding pathological anatomy (autopsies and surgical specimens )
- Practical training periods in pathological anatomy in laboratories approved by the Ministry of Public Health, recognised by the Teaching Committee for Pathological Anatomy. This training includes practising and interpreting autopsies from a macro and microscopic point of view and examining surgical specimens as well as the anatomo-pathological bases of legal medicine.

#### Second part - Further training

Three years of studies, consisting of :

- Theory : questions on special pathological anatomy, special pathological anatomy of the nervous system and muscles
- Seminars : seminars on special pathological anatomy, seminar on dermatopathology and cutaneous immunopathology
- Supervised hospital ward training : Demonstrations and protocols regarding histodiagnosis in special pathological anatomy, including neuropathology
- Apprenticeships in approved laboratories concentrating on examining biopsies and cytological material within various sectors of pathology.

### The programme's courses and learning outcomes

---

For each UCL training programme, a [reference framework of learning outcomes](#) specifies the competences expected of every graduate on completion of the programme. You can see the contribution of each teaching unit to the programme's reference framework of learning outcomes in the document "In which teaching units are the competences and learning outcomes in the programme's reference framework developed and mastered by the student?"

The document is available by clicking [this link](#) after being authenticated with UCL account.

## ANAP2MC - Information

### Admission

---

*In the event of the divergence between the different linguistic versions of the present conditions, the French version shall prevail*

Decree of 7 November 2013 defining the landscape of higher education and the academic organization of studies.

The admission requirements must be met prior to enrolment in the University.

#### General requirements

Subject to the general requirements laid down by the academic authorities, admission to the specialized Master's degree programme will be granted to students who fulfil the entry requirements for studies leading to the award of a Master's (second-cycle) degree and who hold a second-cycle diploma, degree, certificate or other qualification issued within or outside the French Community of Belgium, or whose prior learning or experience has been accredited by the Examination Board as being equivalent to at least 300 credits.

---

#### Specific Admission Requirements

- Applicants must be university graduates in medicine or doctors from another member country of the European Union authorising medical practice in Belgium.
- Applicants must possess a document attesting that, at the end of the selection process, they were selected as specialist candidates in Pathological Anatomy in a Belgian faculty of medicine.

The juridical context and practical procedures regarding these selection tests can be obtained from the secretary's office. Degree holders from outside the European Union are only allowed to register on the programme in the context of procuring a university certificate for partially specialised training for the duration of two years (if they are in the process of doing a specialisation in their country of origin) or for an in-depth specialised training course for the duration of one year (if they are already recognised as specialists in their own country).

The Royal Decree of 30.05.2002, relating to the planning of the medical offer for the public, published on 14.06.2002, applies to those candidates wishing to obtain the title of Specialist Doctor in Pathological Anatomy (those candidates are thus counted among the general practitioner candidates or specialists in the context of the numerus clausus).

Admission applications must be addressed to the academic secretary. The organisation of the entrance selection tests is arranged in accordance with the calendar and the general examination rules and regulations.

## Evaluation

---

The evaluation methods comply with the [regulations concerning studies and exams](#). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

Exams at the end of the first and second parts of the programme, aimed at evaluating the candidate's abilities in the domains of morphological analysis and diagnostic conclusions.

Further to the application of the Royal Decree of 16th March, 1999, at the end of the first two years of training, the candidate will receive an attestation proving that he has successfully accomplished a specific university training programme. The exam focuses on autopsy pathologies and surgical pathology. The cases selected for the exam are presented by the candidate during one of the service seminars.

The exam for the 2nd part focuses on the analysis of pathological cases from various sectors, as well as the writing of a thesis on a subject linked to pathological anatomy. The evaluations are carried out by the ensemble of the pathologists from the sectors concerned who have participated in the training programme.

Upon successful fulfillment of all the above-described training requirements, the teaching committee will duly award the academic title in Pathological Anatomy.

This title does not replace official recognition by the ministerial validation committee. It attests the successful completion of an academic and scientific programme in the context of specialised training leading to validation.
