## **EDPH2M - Introduction**

### **Introduction**

---

## EDPH2M - Teaching profile

### Learning outcomes

The challenge that faces students in physical education in their future careers is to formulate an expert response to the huge needs of our society as far as physical movement is concerned. The objective of the training in physical education is therefore to become a professional in movement.

Physical education professionals maximize the movement potential of human beings to benefit their health. To do this they must fully understand the characteristics of movement and its effects and use them in education. They know their target audiences in terms of age and their motor, physiological, psychological or sociological features. They can organize, communicate and use their skills and knowledge appropriately. They are anxious to assess their practices and update them.

While all these objectives are shared with the 60 credit Master, students on the 120 credit course may specialize by taking focuses and optional subjects.

**On successful completion of this programme, each student is able to :**

1. maîtriser de manière intégrée des savoirs et des savoir-faire complexes (méthodologiques, techniques, didactiques et pratiques), par le biais d'une recherche, dans le cadre de travaux et d'un mémoire lui permettant d'intervenir et de résoudre des problèmes qui relèvent du domaine de la motricité sportive, expressive, sécuritaire, de la santé (bien-être), du conditionnement physique, de la psychomotricité, du management et de la gestion des organisations sportives, et éventuellement de celui de la kinésithérapie et réadaptation.

1.1. Enoncer les référentiels théoriques majeurs qui sous-tendent l'action (en sciences humaines, sciences exactes, sciences biomédicales, sciences du mouvement).

1.2. Démontrer un savoir-faire pratique, technique, méthodologique et didactique dans ces domaines.

1.3. Exercer sa propre activité physique et sportive dans le but d'accéder à un niveau de maîtrise indispensable à une bonne intervention.

1.4. Articuler et intégrer ces différents champs de connaissances (interdisciplinarité).

2. intervenir efficacement et résoudre des problèmes complexes dans les domaines de la motricité sportive, expressive, sécuritaire, de la santé (bien-être), du conditionnement physique, de la psychomotricité, du management et de la gestion des organisations sportives, et éventuellement de celui de la kinésithérapie et réadaptation en s'appuyant sur une démarche autonome et un raisonnement scientifiques.

2.1. Identifier les caractéristiques techniques adaptées et inadaptées d'un geste ou d'une situation et planifie des solutions motrices ou autres adaptées aux objectifs et caractéristiques des participants (amont de l'action).

2.2. Organiser l'intervention en l'adaptant aux objectifs et caractéristiques des participants par l'observation, l'évaluation et le réajustement (pendant l'action).

2.3. Evaluer les résultats de ses interventions (observation structurée sur la base des connaissances), analyse ses pratiques en développant la dimension réflexive (aval de l'action) et améliore, le cas échéant, ses interventions futures.

3. adapter sa communication aux objectifs d'intervention, aux caractéristiques des interlocuteurs (bénéficiaires et les professionnels du domaine) et du contexte (présenter, commenter, accompagner, coordonner,...).

3.1. Expliquer et argumenter ses avis et ses points de vue à ses interlocuteurs.

3.2. Dialoguer de façon efficace et adaptée avec ses interlocuteurs, en faisant preuve de capacité d'écoute, d'empathie et d'assertivité.

3.3. Utiliser efficacement différentes techniques et divers outils de communication (supports visuels, présentation, langages verbal et corporel, ...).

4. collaborer avec des professionnels (d' "autre type") pour atteindre des objectifs communs et produire des résultats positifs.

4.1. Décoder et transformer le cas échéant, les comportements individuels et collectifs des membres des groupes qu'il anime, ainsi que les activités qui y sont associées,

4.2. Percevoir l'impact du contexte sur la dynamique des groupes qu'il anime (temps, lieu et infrastructure, type d'activité, climat organisationnel, ...) et sur les situations où l'activité en équipe est préférable à l'activité individuelle, et vice et versa. Il agit en conséquence de ce qu'il perçoit.

5. développer son autonomie et se construire un projet professionnel dans une logique de développement continu.

5.1. Développer des stratégies pour s'adapter à un environnement professionnel et identifier des éléments de bien-être au travail.

5.2. Intégrer de manière autonome de nouvelles compétences en relation avec les finalités et les options choisies.

5.3. Inscrire sa formation dans le temps, affine ses projets professionnels et prépare son entrée en carrière.

6. se comporter en intervenant responsable en mettant en œuvre un savoir-être professionnel dans le respect de l'éthique et de la déontologie professionnelle.

- 6.1. Contribuer aux débats et controverses actuels dans le domaine des sciences de la motricité, e.a. ceux qui touchent au bien-être et à la santé.
- 6.2. Justifier aussi ses interventions sur la base de sa réflexion sur l'impact social des progrès scientifiques dans les domaines des sciences de la motricité.
- 6.3. Dans une approche éthique et déontologique, rester vigilant en toutes circonstances à la justesse de sa relation au corps.

7. Pour les étudiants ayant suivi la finalité didactique (enseignement)

- 7.1 Mobiliser les compétences nécessaires pour entamer efficacement le métier d'enseignant du secondaire supérieur, en éducation physique, et pouvoir y évoluer positivement
- 7.2 Intervenir en contexte scolaire, en partenariat avec différents acteurs
- 7.3 Enseigner en situations authentiques et variées
- 7.4 Exercer un regard réflexif et se projeter dans une logique de développement continu

Pour plus de détails, consultez l'[agrégation de l'enseignement secondaire supérieur](#) (éducation physique)

## Programme structure

Having gained a bachelor's degree, students can continue their training on the programme for the Master in Motor Skills: Physical Education. This takes two years and comprises core subjects, a focus and an option course.

For this Master, 120 credits are required which are usually spread over two years of study. It comprises the production of a dissertation and provides an opportunity for advanced studies and specialization. There are three possible focuses, the choice of which depends on whether students wish to go on to teaching, research, or another profession in the world of sport.

- **teaching focus**,
- **research focus**,
- **professional focus**.

### Practical training

Centred on physical and sports activities adapted for different groups, the practical training comprises physical and sports activities adapted for different age groups and training for sedentary adults. Students can also do advanced training in three sports of their choice (athletic training, team games, acrobatic sports, swimming, dance and expression).

- **the teaching** takes different forms : lectures, practical courses in small groups, individual work and projects, placements;
- **training in biomedical science** : sports pathology, prevention of illness through physical and sports activities;
- **training for research** which, irrespective of the specialization that students choose, develops their skills in investigating a new subject in a scientific way and interpreting the results in scientific literature ;
- **a dissertation** which gives students experience of a specialized field, either through bibliographic research or experimental work in or outside the laboratory as a result of close collaboration and a privileged learning relationship with their supervisor ;
- **training in human sciences** : history, ethics, sports psychology.

### Professional training

The Master in Motor Skills : Physical Education offers a wide range of specializations directly connected with the professional world. Students must choose one [30 credits] of the three available focuses.

### Teaching

If students wish to make a career in secondary education, they should choose the teaching focus which will enable them to develop

- broad teaching skills adapted to the teaching of physical education,
- personal skills in group management, through practical work,
- a good knowledge of the school environment and the physical education programme in secondary education

At the end of the Master programme with a teaching focus, students are awarded the professional status as a higher secondary education teacher.

### Management of sports organizations

The professional focus in management of sports organizations, linked with the option course in management of physical and sports activities (cf. below), prepares students to manage clubs, federations, sports centres etc. Through courses in the organization of national sports systems, the management and strategy of sports organizations, business management and other courses that may be chosen from the economics and management programmes, students acquire the professional skills necessary for this profession : managing, directing, planning, making strategic plans etc.

The programme contains a significant number of work placements, done in different professional environments so that students can acquire practical experience of management.

### Research

The aim of this focus is to introduce students to the profession of a researcher by joining a research team within a laboratory at the Institute of Physical Education and Rehabilitation. As a first step, students must review the scientific literature which relates to their

research subject. They learn the basis of experimental techniques and approaches and are introduced to scientific communication. The research subject may also be reflected in the final dissertation.

#### **Advanced studies in specialization**

The focuses are supplemented by a group of option courses offering more advanced studies in each specialization.

- **Management of physical and sports activities**

This option course enables students to understand how businesses in the physical activity sector work (sports centres, clubs, fitness centres, the economic sector etc). Training in this area is supplemented by theoretical courses as well as practical experience of business.

- **Sports training**

This option course is designed for trainers of high level athletes in the context of performance improvement. Students are in direct contact with athletes during this training, which is centred on the principles of physical and psychological training of athletes as well as evaluation.

- **Motor skills education**

In this option course, students study the psycho-socio-motor development of children to bring out the principles for interventions in motor skills education. They learn how to take appropriate action in motor skills education mainly through work placements.

- **Motor skills and pathology**

The option course in motor skills and pathology enables the course in motor skills to include the field of pathology. Students make up their programme by choosing courses from the physiotherapy and rehabilitation programme. Should they wish to continue training in physiotherapy and rehabilitation, this option course will count as part of the programme.

- **Interdisciplinary training in business creation**

The interdisciplinary module in business creation is a programme which features in the Master programmes of various faculties [Law, Economic, Socials and Political Sciences, Agronomy, Louvain Polytechnic School, Medicine (Institute of Physical Education and Rehabilitation)]. It is designed to provide training in business creation and entrepreneurship in the widest sense of the term.

*For a programme-type, and regardless of the focus, options/or elective courses selected, this master will carry a minimum of 120 credits divided over two annual units, corresponding to 60 credits each.*

| ❖ LTECO1001 | Questions of religious sciences: biblical readings                 | Didier Luciani,<br>Audrey Wauters<br>(compensates Didier Luciani) | 15h | 2 Credits | 2q | x |
| ❖ LTECO1002 | Questions of religious sciences: reflections about christian faith | Pierre-Yves Materne                                               | 15h | 2 Credits | 1q | x |
| ❖ LTECO1003 | Questions of Religious Sciences: Questions about Ethics            | Dominique Jacquemin                                               | 15h | 2 Credits | 1q | x |

**○ Formation à la recherche (7 crédits)**

|             |                                           |                     |         |           |    |   |
|-------------|-------------------------------------------|---------------------|---------|-----------|----|---|
| ● LEDPH2137 | research methodology in movement sciences | Dominique De Jaeger | 30h     | 4 Credits | 1q | x |
| ● LIEPR1026 | Statistics                                | Céline Bugli        | 15h+15h | 3 Credits | 2q | x |

**○ Sciences biomédicales (9 crédits)**

|             |                                                                                            |                  |     |           |    |   |
|-------------|--------------------------------------------------------------------------------------------|------------------|-----|-----------|----|---|
| ● LEDPH2136 | Pathology of sports                                                                        | Sophie Lambrecht | 30h | 4 Credits | 2q | x |
| ● LIEPR2236 | Prevention and therapeutical effect of the physical activity on the major chronic diseases | Gilles Caty      | 30h | 5 Credits | 1q | x |

**○ Formation pratique (13 crédits)**

Outre le cours d'activités physiques et sportives adaptées, et la partie relaxation du cours EDPH2135 qui sont obligatoires, l'étudiant doit choisir, dans le cadre du complément de formation pratique, 3 activités parmi celles qui lui seront proposées en début d'année (athlétisme, jeux collectifs, sports acrobatiques, natation, danse,...)

|             |                           |                     |         |           |        |   |
|-------------|---------------------------|---------------------|---------|-----------|--------|---|
| ● LIEPR1027 | Adapted physical activity | Yannick Bleyenheuft | 30h+30h | 3 Credits | 2q     | x |
| ● LEDPH2135 | Relaxation                | Alain Moreaux       | 0h+30h  | 4 Credits | 1 + 2q | x |

**○ Choix dans la formation pratique**

L'étudiant choisit 3 cours parmi les 5 proposés :

|             |                                                         |                                              |     |           |        |   |
|-------------|---------------------------------------------------------|----------------------------------------------|-----|-----------|--------|---|
| ❖ LEDPH2130 | Dance and Expression: diversification                   | Cécile Delens                                | 30h | 2 Credits | 1q     | x |
| ❖ LEDPH2131 | Coaching swimming and water activities: diversification | Thierry Marique                              | 30h | 2 Credits | 1 + 2q | x |
| ❖ LEDPH2132 | Sports Acrobatics                                       | Dominique De Jaeger                          | 30h | 2 Credits | 1q     | x |
| ❖ LEDPH2133 | Collectives games: diversification                      | Bernard Lanotte,<br>Thierry Marique (coord.) | 30h | 2 Credits | 1q     | x |

|           |                   |              |     |           |    | Year |
|-----------|-------------------|--------------|-----|-----------|----|------|
| LEDPH2134 | Athletic Training | Valérie Mees | 30h | 2 Credits | 2q | x    |

## FORMATION INTERDISCIPLINAIRE EN CRÉATION D'ENTREPRISE [30.0]

Le module interdisciplinaire "Création d'entreprises" (CPME) est un programme optionnel s'insérant dans les programmes de master de plusieurs facultés [Droit, Sciences économiques, sociales et politiques, Agronomie, Ecole polytechnique de Louvain, Médecine (Institut d'éducation physique et de réadaptation)]. Il vise à former les étudiants à la création d'entreprises et à l'entrepreneuriat au sens large.

A terme, l'étudiant aura acquis les outils d'analyse et de réflexion qui l'aideront à créer ou reprendre une entreprise, à développer des projets entrepreneuriaux au sein d'organisations existantes ou à comprendre les processus entrepreneuriaux. En outre, l'étudiant sera familiarisé avec d'autres disciplines et aura appris à travailler en équipes interdisciplinaires.

Le choix de l'option CPME implique la réalisation d'un [mémoire interfacultaire « CPME »](#) équivalant au mémoire facultaire. L'étudiant réalisera donc son mémoire avec deux étudiants de deux autres facultés portant sur un projet de création ou de reprise d'une PME ayant un rapport avec le monde du sport.

L'accès à cette option est limité et nécessite de participer à une [procédure de sélection](#).

## Course prerequisites

---

A document entitled [en-prerequis-2015-edph2m.pdf](#) specifies the activities (course units - CU) with one or more pre-requisite(s) within the study programme, that is the CU whose learning outcomes must have been certified and for which the credits must have been granted by the jury before the student is authorised to sign up for that activity.

These activities are identified in the study programme: their title is followed by a yellow square.

As the prerequisites are a requirement of enrolment, there are none within a year of a course.

The prerequisites are defined for the CUs for different years and therefore influence the order in which the student can enrol in the programme's CUs.

In addition, when the panel validates a student's individual programme at the beginning of the year, it ensures the consistency of the individual programme:

- It can change a prerequisite into a corequisite within a single year (to allow studies to be continued with an adequate annual load);
- It can require the student to combine enrolment in two separate CUs it considers necessary for educational purposes.

For more information, please consult [regulation of studies and exams](#).

## The programme's courses and learning outcomes

---

For each UCL training programme, a [reference framework of learning outcomes](#) specifies the competences expected of every graduate on completion of the programme. You can see the contribution of each teaching unit to the programme's reference framework of learning outcomes in the document "In which teaching units are the competences and learning outcomes in the programme's reference framework developed and mastered by the student?"

The document is available by clicking [this link](#) after being authenticated with UCL account.

## EDPH2M - Information

### Admission

*General and specific admission requirements for this program must be satisfied at the time of enrolling at the university..*

- University Bachelors
- Non university Bachelors
- Holders of a 2nd cycle University degree
- Holders of a non-University 2nd cycle degree
- Adults taking up their university training
- Personalized access

## Teaching method

---

The **Master in Motor Skills: Physical Education** is centred on learning and deepening knowledge and skills in various fields of application (human sciences, training for research, biomedical science and practical training). The teaching takes different forms: lectures, practical courses in small groups, individual work and projects and work placements.

Alternative teaching methods (project work, seminars, placements etc.) are used especially for the focuses and the option courses. By doing a **dissertation**, students can specialize in a precise area, either through bibliographic research or experimental work in or outside the laboratory as a result of close collaboration and a privileged learning relationship with their supervisor

## Evaluation

---

*The evaluation methods comply with the [regulations concerning studies and exams](#). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading “Learning outcomes evaluation method”.*

The examinations are organized in three main sessions : in January, June and September.

For the theoretical courses, assessment is based on a written or oral examination and may be combined and/or replaced by elements of continuous assessment, particularly for assignments, projects, seminars and work placements.

For the practical training, there is continuous assessment which may be supplemented by a final assessment.

Students will be informed of the type of assessment to be used at the beginning of each course.

## Mobility and/or Internationalisation outlook

---

The professional focus in management of sports organizations and the option course in management of physical and sports activities represent a group of courses from the European Master in the Interdisciplinary Teaching Applied to the Management of Physical and Sports Activities (Enseignement interdisciplinaire appliqu  au management de l'activit  physique et sportive - EIMAPS). Students from UCL who take this special European subject must gain a minimum of 30 credits abroad, by spending a semester in one of the partner universities (France, Czech Republic and Poland).

There is also a series of partnerships with European and North American universities under the ERASMUS and MERCATOR exchange schemes. This gives a much more international outlook to the programme for the Master in Motor Skills: Physical Education. Students can study for 30 credits at a partner university for a semester.

## Possible trainings at the end of the programme

---

Advanced Masters : none

Doctoral programmes : doctorate in motor skills
