LING2M - Introduction

Introduction

Introduction

This Master's degree is designed to provide advanced training in general and applied linguistics. The objective is to provide a route into research or a post in written or spoken communication in the widest sense (terminology, dictionaries, text readability etc.).

Your profile

You

- have discovered, during your first training in language and literature or taking the linguistics minor, a marked interest in linguistic issues ;
- wish to understand how a language functions in context and are curious about the mechanisms of language ;
- wish to focus your training towards practising your skills in a professional environment ;
- would like to deepen your linguistic knowledge in your native language and/or one or two foreign languages.

Your programme

The Master's degree offers you

- training which combines linguistic theory and applied linguistics ;
- wide interdisciplinary range (IT, didactics, psychology etc.) ;
- an à la carte programme, in which you can combine different option courses and focuses ;
- the possibility of a study visit abroad or work experience in the field ;
- the opportunity to put your skills to the test in a professional environment, during a work placement in a research centre or in a company, depending on your specialisation.

LING2M - Teaching profile

Learning outcomes

Students on the Master [120] Linguistics prepare themselves for the challenge of becoming experts in language and languages, with a rigorous and functionalist approach, who contribute to the significant issues and challenges relating to the application of linguistic analysis to other fields (lexicography, translation, learning and teaching languages, etc.).

The aim of the Master in Linguistics is to provide in-depth training in general and applied linguistics, in the students' mother tongue and/or one or two foreign languages, opening the way for students to go into research or to work in an allied field of written or oral communication in every sense (terminology, dictionaries, readability of texts, etc.).

In order to achieve that, students will master a large and well-accepted base of knowledge, know-how and skills in linguistics which they are able to employ in order to approach, analyse and respond to situations/problems touching upon all the complex and transversal aspects of linguistics. Therefore, at the end of their training, students will have:

- a broad and solid mastery of the principles and mechanisms involved in how language and languages operate;
- the ability to analyse and interpret all aspects of language phenomena (oral and written language; first, second or foreign languages; language varieties; etc.) on the basis of their mastery of a range of linguistic models and theories and their components;
- an excellent mastery of languages and scientific reasoning allowing them to provide data for a linguistic problem and explain challenges in different professional contexts (language industry, writing dictionaries, translation, language-learning materials...);
- a real expertise in oral and written communication founded upon expert language skills and their ability to overcome linguistic challenges and adapt to the target audience;
- an initial professional experience acquired during an internship in a research centre or business.

The students will give priority, by deciding what they will focus upon, to either training oriented towards professions in the language industry ("Natural Language Processing" focus) or, to professions requiring excellent abilities in one or more languages, combining a solid training in linguistic theory and methodology ("Linguistics and its Applications for a Multilingual Society" focus).

In addition, students will, in particular thanks to a professional internship, have developed a significant capacity for adaptation and the ability to question and engage in professional practice. Students will integrate a continuous developmental logic which allows them to perform as professionals demonstrating high-level expertise and flexibility, and be able to adapt and develop positively within the context of their work.

On successful completion of this programme, each student is able to :

1. Demonstrate an in-depth and specialised mastery of linguistic models and theories and their components.

- 1.1. Identify and master linguistic units, their interrelations and the processes influencing them.
- 1.2. Distinguish the different levels of linguistic analysis, phonology, lexicology, syntax, semantics, pragmatics.
- 1.3. Identify different types and sources of linguistic and non-linguistic meaning.
- 1.4. Demonstrate an in-depth and advanced mastery of the nature of and grounds for linguistic theories, principles, hypotheses and explanations.
- 1.5. Describe and explain the component principles of theoretical models linked to a given field of analysis.

2. Demonstrate a specialised mastery of the methodological linguistic tools, oral and written data collection and analysis methods and an ability to employ them in a relevant and critical way in order to understand the complexities of a linguistic phenomenon.

- 2.1. Select appropriate methodological tools for different types of linguistic research.
- 2.2. Include the relationship between theoretical approaches and methodological practice in their analysis.
- 2.3. Employ the relevant methods to collect oral and written data, construct linguistic corpora and manage and maintain them and extract information from them.
- 2.4. Master and employ basic oral and written linguistic data analysis methods and techniques in a relevant way.

3. Develop a linguistic argument which applies to linguistic problems.

- 3.1. Recognise and define linguistic problems in the fields of corpus linguistics, discourse analysis and contrastive linguistics.
- 3.2. Develop critical reflections on received ideas relating to language.
- 3.3. Examine and question the relationship between language and context (social) which includes opening the way to connected disciplines.
- 3.4. Integrate the notion of linguistic variation at all levels of linguistic analysis.
- 3.5. Interpret variation in linguistic form and reflect upon the tension between linguistic standards in the language in question.
- 3.6. Construct a linguistic argument employing relevant linguistic data.

4. Create and realize an individual research assignment, implementing a rigorously scientific and methodological approach in order to go deeper into a scientific linguistic question.

- 4.1. Define and formulate a scientific linguistic question.

- 4.2. Produce a critical summary of the scientific literature relating to that question, employing the relevant theoretical frameworks and making sure to contextualize the problem in relation to current knowledge.
- 4.3. Define their working hypotheses and argue them.
- 4.4. Construct and implement rigorous methodological measures relevant for looking more deeply into the question, justifying their choices and methodologies.
- 4.5. Create and realize, where appropriate, an empirical, quantitative and/or qualitative study, calling upon the appropriate analytical tools.
- 4.6. Analyse and interpret results (complex linguistic data) including the criticism being argued, by employing the relevant theoretical frameworks appropriately.
- 4.7. Develop an ability to summarize and formulate scientific conclusions.
- 4.8. Demonstrate the critical rigour, precision and distance (both in their own work as well as the knowledge and methodologies used in it) which are essential to all work at university level.
- 4.9. Demonstrate the relevance and quality, specific to the demands of a profession in linguistics, both in terms of composition and presentation.

5. Professionally communicate, by employing their expert language skills and incorporating linguistic issues, adapting to the context and target audience and constructively interacting and collaborating with the different actors involved in a given situation.

- 5.1. Have skills in written and oral comprehension in English which fulfil the requirements of level C1 of the Common European Framework of Reference for Languages.
- 5.2. Have skills in written and oral comprehension as well as written and oral expression which fulfil the requirements of level C1 of the Common European Framework of Reference for Languages in French and/or English, according to the electives chosen.
- 5.3. Explain the details of a linguistic problem and the linguistic challenges in various professional contexts, formulated in a way that it can be understood by actors in the field, in their fields of specialisation (depending upon their choices of elective).
- 5.4. Effectively integrate into and collaborate with a team and different actors in networks involved in a given situation (in educational and professional (internship), national or international and multicultural contexts), in their fields of specialisation (depending upon their choice of elective).

6. Act as an academic and critical and responsible actor with a plan for continuing development.

- 6.1. Progress in professional practice in accordance with a grounded academic approach (from a theoretical and methodological point of view) characterised by a critical distance.
- 6.2. Engage in, decide upon and act in respect of work and third parties in an independent and responsible manner in line with the relevant framework.
- 6.3. Cast a critical eye over their own knowledge and competencies (linguistic and others) and independently put in place methods and opportunities to improve them as part of a system of continuing development which is indispensable in order to progress in a positive way in their social and professional environments.

7. Employ all the complex and transversal aspects of linguistic analysis skills where relevant, in other domains which are more or less connected to linguistics.

7.1 If the “Linguistics and its Applications for a Multilingual Society (LAMUSO)” focus course has been chosen: grasp the relevance of linguistics to adjacent fields and employ their excellent language skills, including the linguistic analysis tools and methods, in two or more languages, to act relevantly in those fields (lexicography, translation, foreign language learning and teaching, etc.).

- 7.1.1 Develop skills which are specific to language usage, in particular in multilingual contexts, and in relation to the connected methods, models and applications in linguistic research; in two or more languages.
- 7.1.2 Take responsibility for or directly contribute to the realisation of a project with an important linguistic component (language teaching, linguistic policy, linguistic competency tests, writing teaching texts, dictionaries, etc.).
- 7.1.3 Within the framework of a specific professional experience (in a business or a research centre), employ a wide range of knowledge and skills in linguistics and otherwise, integrate the requirements of the development of applied linguistic projects and experience a professional environment for the first time.

7.2 If the “Natural Language Processing” focus course is chosen: make use of and create Natural Language Processing solutions (choose methodologies, apply specialised tools, programme applications, create linguistic tools) in order to respond to the needs of the language industry (linguistic engineering, machine translation, term extraction, information extraction, text generation, speech processing, etc.).

- 7.2.1 Master the methods, technologies and concepts which are essential to the automatic processing of natural language (intelligent text processing, the man-machine interface, machine translation, document navigation, etc.).
- 7.2.2 Master a solid base of knowledge and skills in the programming of computers and algorithms and employ them as relevant to programme specific applications and create linguistic tools.
- 7.2.3 Take responsibility for or contribute directly to the realization of an application for the processing of language by machines or a study on a complex use of NLP software.
- 7.2.4 Within the framework of a specific professional experience (in a business or a research centre), employ a wide range of knowledge and skills in linguistics and otherwise, integrate the requirements of the development of real NLP applications and experience a professional environment for the first time.

Programme structure

The programme is made up of :

- core courses (60 credits), made up of:
 - 30 credits for theoretical and methodological courses;
 - 30 credits for activities linked to the dissertation;
- one focus (30 credits);
- and optional courses (30 credits).

For a programme-type, and regardless of the focus, options/or elective courses selected, this master will carry a minimum of 120 credits divided over two annual units, corresponding to 60 credits each.

○ Dissertation and dissertation seminar (30 credits)

☒ Dissertation and work placement in Natural Language Processing (30 credits)

For students doing the professional focus in automatic language processing, the dissertation includes a laboratory research placement of a minimum of 7 weeks which is an essential part of the dissertation. For these students, the 30 credits awarded for the dissertation are spread as follows :

● LLING2891	Dissertation seminar	N.		5 Credits	1 + 2q	X	
● LLING2896	Dissertation	N.		15 Credits	1 + 2q		X
● LLING9996	Internship in Research group	N.	240h	10 Credits			X

☒ Dissertation LAMUSO (30 credits)

For students taking the LAMUSO focus, the 30 credits linked specifically to the dissertation are divided as follows :

● LLING2891	Dissertation seminar	N.		5 Credits	1 + 2q	X	
● LLING2892	Dissertation	N.		25 Credits	1 + 2q		X

LIST OF FOCUSES

The student chooses one of the following focuses :

- > Professional focus:Natural Language Processing [en-prog-2015-ling2m-lling202s]
- > Professional focus:Linguistics and its Applications for a Multilingual Society [en-prog-2015-ling2m-lling203s]

PROFESSIONAL FOCUS:NATURAL LANGUAGE PROCESSING [30.0]

This professional focus trains students in language industry tools (spell-checking, speech recognition, machine translation, document management, etc.). With its strong business focus, this specialization welcomes guest researchers (from academia and business) and offers a company internship. PROFESSIONAL FOCUS:LINGUISTICS AND ITS APPLICATIONS FOR A MULTILINGUAL SOCIETY [30.0]

The master degree specialisation "Linguistics and its Applications for a Multilingual Society" (LAMUSO) focuses on usage-based models and methods in language research and their applications, especially in multilingual contexts. It provides a combination of fundamental courses in various domains of linguistics and more practice-oriented modules related to several fields of activity. One of the main features of the programme is its strong multilingual component. It can be followed entirely in English or in a combination of languages (Dutch, English, French, German), and students have access to advanced descriptive courses of these languages. The aim of the LAMUSO programme is to satisfy the growing demand from both public and private sectors for professionals combining excellent language skills in two or more languages and solid linguistic theory and methodology. Hence, the programme trains students to become professionals in fields such as language teaching, language curriculum design, language syllabus design, language testing, language policy, language technologies, etc. Access to high-level training in scientific research is also provided thanks to the strong collaboration between the linguistics programme and several top research centres hosted by the research [Institute for Language and Communication](#).

Students enrolled in the LAMUSO specialization are encouraged to apply for an Erasmus grant to cover a period of study at a university offering an interesting range of linguistics courses.

- Germany: [Erlangen-Nürnberg](#) or Giessen;
- France: Paris 7, Grenoble 3 and Toulouse 2;
- Switzerland: Fribourg, Geneva;
- The Netherlands: [Leiden](#) or Nijmegen;
- Norway: [Oslo](#);
- Sweden: Lund;
- Finland: Jyväskylä.

Students can also apply for the double degree in Linguistics, organized in conjunction with the University of Oslo: the first block of the Master's programme (including the internship) is taken at UCL, and the second block (including the thesis) at the University of Oslo.

❖ Computational linguistics and computer science

Courses in algorithmics, database design, programming, etc. Several courses may be taken at the University of Namur and at KU Leuven. These courses enable students pursuing the professional focus in Natural Language Processing to complete their programme by enhancing their training in computer science.

⌘ Prerequisite in computing

These courses are recommended for students who have not undergone equivalent training.

⌘ LINGE1322	Computer science: Analysis and Design of Information Systems	Stéphane Faulkner, Stéphane Faulkner (compensates Jean Vanderdonckt), Jean Vanderdonckt	30h+15h	5 Credits	2q	x

❖ Other courses

To be chosen from the Faculty or University programmes, with the agreement of the Programme Committee Chair and the Examination Board Secretary. Students must check with the lecturer in charge that they may take the course(s) in question.

Course prerequisites

A document entitled [en-prerequisites-2015-ling2m.pdf](#) specifies the activities (course units - CU) with one or more pre-requisite(s) within the study programme, that is the CU whose learning outcomes must have been certified and for which the credits must have been granted by the jury before the student is authorised to sign up for that activity.

These activities are identified in the study programme: their title is followed by a yellow square.

As the prerequisites are a requirement of enrolment, there are none within a year of a course.

The prerequisites are defined for the CUs for different years and therefore influence the order in which the student can enrol in the programme's CUs.

In addition, when the panel validates a student's individual programme at the beginning of the year, it ensures the consistency of the individual programme:

- It can change a prerequisite into a corequisite within a single year (to allow studies to be continued with an adequate annual load);
- It can require the student to combine enrolment in two separate CUs it considers necessary for educational purposes.

For more information, please consult [regulation of studies and exams](#).

The programme's courses and learning outcomes

For each UCL training programme, a [reference framework of learning outcomes](#) specifies the competences expected of every graduate on completion of the programme. You can see the contribution of each teaching unit to the programme's reference framework of learning outcomes in the document "In which teaching units are the competences and learning outcomes in the programme's reference framework developed and mastered by the student?"

The document is available by clicking [this link](#) after being authenticated with UCL account.

LING2M - Information

Admission

General and specific admission requirements for this program must be satisfied at the time of enrolling at the university..

Specific Admission Requirements

1° Student must hold a first level university degree.

2° Courses are available to students in several languages (French, English, Dutch, Spanish and Italian). For each language selected, students must prove they have attained Level B2+ of the [Common European Framework of Reference for Languages](#)

3° Student must have followed training including at least 30 credits in linguistics and/or 'sciences du langage', including the following 2 courses (or their equivalent) : LFLTR1530 'Introduction aux sciences du langage' (4 credits) and LFLTR1560 'Linguistique générale' (3 credits).

4° Student must demonstrate :

⇒ sufficient skills in the French language, of both a written and oral nature;

⇒ the capacity to develop an argument on the language heard as a general sign and not just a linguistic sign;

⇒ an understanding of the way language works internally (basic units and structures, contemporary theories) and externally (relationship with other disciplines).

If student does not have sufficient training in one or several of these subjects, prerequisites will be added to the masters programme (maximum 15 credits).

The 30 credits of the [Minor in Linguistics \[30.0\]](#) satisfy these requirements.

If the total number of prerequisites exceeds 15 credits, access to the master is subject to the student passing an [Preparatory year for Master in Linguistics \[60.0\]](#), the programme of which is established based on the student's file.

Course equivalences are submitted for approval to the chairman of the jury, the secretary of the jury and the academic faculty secretary.

Admission and Enrolment Procedures for general registration

Specific procedures :

Requests for additional information regarding admission should be addressed to Mme Fiorella Flamini, Study Adviser at the **Faculty of Philosophy, Arts and Letters** (conseiller.etudes-fial@uclouvain.be , tel. : +32 (0)10 47 48 57).

All requests for admission based on the student's academic record (as well as category II and III bridging programmes) should be submitted to Mme Fiorella Flamini, Study Adviser at the **Faculty of Philosophy, Arts and Letters** (Collège Mercier, 14 bte L3.06.01, Place Cardinal Mercier B-1348 Louvain-la-Neuve, conseiller.etudes-fial@uclouvain.be , tel. : +32 (0)10 47 48 57). The application file should include a letter in support of the application, academic transcripts for every year in higher education, a copy of the qualification(s) gained and, where the student has had a professional career, a curriculum vitae.

International candidates should submit their request to the University Enrolment Office according to the procedure outlined at : <https://uclouvain.be/fr/etudier/inscriptions>

Supplementary classes

To enrol for this Masters, the student must have a good command of certain subjects. If this is not the case, they must add preparatory modules to their Master's programme.

Teaching method

Evaluation

The evaluation methods comply with the [regulations concerning studies and exams](#). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

The way the course is evaluated varies depending on what subject is being taught (see syllabus).

Depending on the size of the group, and the subject in question, the possibilities are as follows :

- "traditional" evaluation in the form of a final oral or written exam;
- "traditional" evaluation combined with exercises during the year;
- group work in the place of an exam;
- individual work in the place of an exam;
- internship, supervised and evaluated by a "maître de stage" and an academic.

Courses are evaluated according to current university regulations (see General Examination Regulations). Students may find further information on specific evaluation methods in the course descriptions.

To obtain a student's average, the grades awarded for each course unit are weighted by their respective credits.

Mobility and/or Internationalisation outlook

Welcoming foreign students

Master's in Linguistics students come from far and wide. More than half of our student body is international: from France, Italy, Armenia, Turkey, Poland, Rwanda, Burundi, Japan, Mexico, Algeria, etc. This rich cultural and linguistic diversity is a real bonus for both the linguistics lecturers (particularly in courses such as semantics, lexicology and contrastive linguistics) and the other students. We do our utmost to extend a personal welcome to all our students. Alongside the courses taught in French, various courses are available in English, Dutch or German. Students can opt to undergo assessments and write their thesis in English.

For more information : [Marie-Julie Malache](#)

Interuniversity programme with KULeuven

The student can study a lot of courses and seminars at KULeuven ; an explicit agreement was reached on this issue with the Faculteit Letteren de la [KULeuven](#).

Double degree with the University of Oslo

There is a double degree agreement with the University of Oslo (UiO). Students doing the LAMUSO focus can apply for this programme organising the first block at UCL and the second in Oslo. This results in a double degree : a Master's degree in linguistics with a professional focus at UCL and Master of Philosophy in Linguistics and its Applications for a Multilingual Society at UiO. More informations : <https://www.uclouvain.be/en-dd-ling.html>

Erasmus/Socrates stay

The [Erasmus](#) stay will preferably take place during the 2nd semester of the first block or during the 1st semester of the second one block. Specific bilateral agreements for the Master en linguistique have been reached with Paris 13, Grenoble 3 and Toulouse 2. Moreover, various agreements reached by the départements d'études germaniques (GERM) and d'études romanes (ROM) are open to students taking the Master in Linguistics.

Numerous partnerships with the Faculty of Philosophy, Arts and Letters (FIAL): see <https://www.uclouvain.be/280052>

Students who have enrolled for the LAMUSO professional focus are encouraged to apply for an Erasmus scholarship to enable them to make a study visit, during the second year of the Master's programme, in one of the following universities :

[Universiteit Leiden](#) (Leiden University Centre for Linguistics) (1year)

[University of Oslo](#) (Department of European Languages (ILOS)) (1 or 2 semesters)

[Friedrich-Alexander-University Erlangen-Nürnberg](#) (Departments of English and German) (1 or 2 semesters)

Possible trainings at the end of the programme

Other accessible masters :

At the end of the master 120, each focus of the Master in Linguistics can be obtained in a new block of 30 credits only.

Accessible doctoral training :
