MURG2MC - Introduction

Introduction

MURG2MC - Teaching profile

Learning outcomes

This programme in the Advanced 2nd cycle is designed to prepare doctors to qualify for the professional status of specialist doctor in emergency medicine (Ministerial Decree of 14 February 2005, published on 4 March 2005).

Programme structure

Full time training takes at least six years and includes theoretical teaching, full time placements and a paper or the publication of an article.

Prior training for the Advanced Master in Intensive Medicine may count towards this, for three years.

The plan for the placement drawn up by the university placement coordinator must be approved by the ministerial qualification committee for the relevant specialization. These placements include duty activities.

MURG2MC Detailed programme

Programme by subject

La formation à temps plein comprend :

un enseignement théorique :

- des cours théoriques
- des séminaires
- des exercices encadrés, organisés par les différents services de département, la société belge de médecine d'urgence et de catastrophe
- des conférences inter-universitaires.

des stages à temps plein dans un ou plusieurs services d'urgences agréés

- dont douze mois dans un service de soins intensifs,
- et 2 ans maximum dans des services de stages agréés pour la formation dans l'une des disciplines suivantes : anesthésie-réanimation, médecine interne, cardiologie, gastro-entérologie, pneumologie, rhumatologie, chirurgie, neurochirurgie, urologie, orthopédie, chirurgie plastique, pédiatrie, neurologie.

une communication à une réunion scientifique qui fait autorité ou la publication d'un article sur un sujet de médecine d'urgence dans une revue scientifique de référence.

The programme's courses and learning outcomes

For each UCL training programme, a [reference framework of learning outcomes](#) specifies the competences expected of every graduate on completion of the programme. You can see the contribution of each teaching unit to the programme's reference framework of learning outcomes in the document "In which teaching units are the competences and learning outcomes in the programme's reference framework developed and mastered by the student?"

The document is available by clicking [this link](#) after being authenticated with UCL account.

MURG2MC - Information

Admission

In the event of the divergence between the different linguistic versions of the present conditions, the French version shall prevail

Decree of 7 November 2013 defining the landscape of higher education and the academic organization of studies.
The admission requirements must be met prior to enrolment in the University.

General requirements

Subject to the general requirements laid down by the academic authorities, admission to the specialized Master's degree programme will be granted to students who fulfil the entry requirements for studies leading to the award of a Master's (second-cycle) degree and who hold a second-cycle diploma, degree, certificate or other qualification issued within or outside the French Community of Belgium, or whose prior learning or experience has been accredited by the Examination Board as being equivalent to at least 300 credits.

Specific Admission Requirements

- Candidates must have a degree as a Doctor in medicine, or a Master in medicine or as a doctor from a member state of the European Union which enables them to practise in Belgium.
- They must also have a document showing that after the selection examination, they have gained a place to specialize in emergency medicine in a Belgian medical faculty.

NB : Prior training for the Advanced Master in Intensive Medicine may count for three years.

Further details of the legal requirements and the practical procedures involved in the selection examination may be obtained from the administrative office. Holders of a degree from outside the European Union may not enrol for this programme except in the context of a university certificate in partial specialized training lasting two years (if they are studying a specialization in their home country) or advanced specialized training for a year (if they have already gained the status of specialist in their country).

Applications should be submitted to the lecturer in charge of the programme. The organization of the selection examination is in accordance with the timetable and the general examination regulations.

Selection committee

Bodart Eddy, Danse Etienne, Dubois Vincent, EL GARIANI Abdul Wahed, GILLET Jean Bernard , MARION Eric, MEERT Philippe, MOULIN Didier , Reynaert Marc, THYS Frédéric, VANDENBOSSCHE Pierre, VANPEE Dominique, VERSCHUREN Franck, VEYCKEMANS Francis, two coopted members (Zech Francis, Delloye Christian) and two invited members (Jacques Jean Marie, Pelgrim Jean Pierre). A representative from the MACCS.

Evaluation

The evaluation methods comply with the [regulations concerning studies and exams](#). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

Candidates' knowledge will be tested through continuous assessment by the placement supervisor and by examinations on the subjects taught. In addition, candidates must produce a piece of scientific work to present in a public class and to a national or international emergency medicine convention and/or published in a recognized scientific journal.

When the above requirements have been fulfilled, the programme committee will award the academic qualification in emergency medicine.

This is not a substitute for recognition by the ministerial committee. It is evidence of academic and scientific training in the context of specialized training leading to the award of professional status.

Training as a specialist doctor in intensive medicine may count for three years towards the total of six years' training required to become a specialist doctor in emergency medicine.
